

Miscellaneous Writings: Chronological Index

Miscellaneous Writings 1883-1896 was first published in 1897. It is comprised of pieces written by Mary Baker Eddy as well as other writings, taken primarily from *The Christian Science Journal*.

Why did Mary Baker Eddy compile *Miscellaneous Writings*? There are probably several reasons for this. First, before the advent of photocopying, reprinting was the easiest way to obtain copies of articles published in newspapers or magazines. (In fact, this is probably why some of the articles in *Miscellaneous Writings* were reprinted in the *Journal*.) Compiling these articles into one volume enabled readers to have them at their disposal easily. Also, the demands on Mrs. Eddy's time were extraordinary: she was teaching, writing and editing *Science and Health with Key to the Scriptures* as well as other, smaller works, preaching, and maintaining a large and active correspondence with her students and others. It's understandable she would not have time to write up responses to the many inquiries she received. She felt that compiling these writings into a single volume would hopefully answer many questions about Christian Science and its Founder.

This index is primarily intended to help in locating the original *Journal* articles that are the source for much of *Miscellaneous Writings*. The information has been sorted chronologically, and also by the page number in which an article appears in *Miscellaneous Writings*. However, it's important to note that Mary Baker Eddy made numerous changes to many of these pieces before their publication in *Miscellaneous Writings*. In some instances the final product bears only a passing resemblance to the original article.

This finding aid is a work in progress. The Research staff of The Mary Baker Eddy Library feels that readers of *Miscellaneous Writings* will benefit from learning more about the context for each piece found in this book, so we will be adding additional historical information, as well as pointing out differences between the original *Journal* articles and the versions printed in *Miscellaneous Writings*.

This unique compilation is colorful, diverse, and inspiring, and we hope this finding aid will help readers explore and appreciate this important book.
